## Insect Amusement Park

An insect amusement park might be the perfect thing to keep the insects that you found on your bug hunt coming back to your yard every day!

Some materials that you can use to build:

- Sticks
- Leaves
- Grass (to tie objects together)
- Mud (for cementing your rides to each other)
- Rocks

Anything that you find outside can be turned into a ride! Try to make a Ferris wheel out of sticks tied together with grass! Or make an insect roller coaster using mud to bind your sticks together and small rocks as the carts for the insects to sit in. Think of your favorite amusement park ride and make it for your insect friends!
